Assignment # 02 Professional Practices (SAMREEN JAVED)

ABDUL RAFEH CSC-203-104 Sec: 3C (CS)

Q. Write any two situations when you feel your work is copyrighted, Plagiarized, hacked?

Ans

First Situation:-

In first situation or first step I'll follow these steps if my work is copyrighted, plagiarized and hacked steps mentioned below:-

I knew that someday that this would happen but, it still gave me a shock to see someone do this with such blatant disregard for other people's hard-work. It's one thing to someone else's work but to then share it with others in your network and pass it off as your own? That's unacceptable.

First thing I did was let my family & friends know about it. Several brains work better than one. My friend advised me to report them on related website/apps link for copyright infringement. After we sending claim to related website/app then we get reply from them and they said that because the "Reported content is not occurring within the respect website/app platform. For that reason, we have no authority to address the issue".

Despite the fact that the content that was shared was plagiarized and infringed on my copyrighted, because the content was not on the respected live platform or self, they couldn't do anything about it.

Second Situation:-

In this situation my work was copyrighted, plagiarized and first we tell the person do not use my work in any situation without my permission other wise I'll take strictly action on this time because you are using my work and

violate the rule and regulation and you'll faced hardline and
trouble in it. if the person which hacked my work and copyrighted,
plagiarized are not listening my word so I'll send email to hosting
Provider and ask them that in your website are using my work without
my information. If they can give me update on the case so I'll ask
them removed that work and after that I'll check the website that
work is deleted or not. furthermore, the 'blog' section of that person's
website, which contained the articles of many other writers, we removed.
So in second situation I'll take that action if my work was copyrighted,
plagiarized and hack all my action is follow rules and regulation or
Respected Site/Apps.
