

ABDUL's Loan System

INTRODUCTION: A loan management system is a digital platform that helps automate every stage of the loan lifecycle, from application to closing. The traditional loan management process is meticulous, time-consuming, and requires collecting and verifying information about applicants, their trustworthiness, and their credibility. Further, the process involves calculating interest rates and supervising payments. A loan servicing software not only automates these procedures but also provides useful analytics and insights for lenders and borrowers.

Key Feature's:

- User Information (Full Name, Job Detail, Salary Detail).
- Loan Amount.
- Loan Term (Short or Long).
- Loan Type (House, Business)
- Loan Installment.
- Due Installment.
- Late Installment.
- Monthly Data Record.

Languages:

- HTML
- CSS
- JavaScript (JS)
- PHP
- SQL / MySQL

IDE:

- Visual Studio.
- Sublime Text.
- SQL Server Management Studio.
